

# Applications

Transform Any Environment with Systemline's  
Single-Room Audio Systems

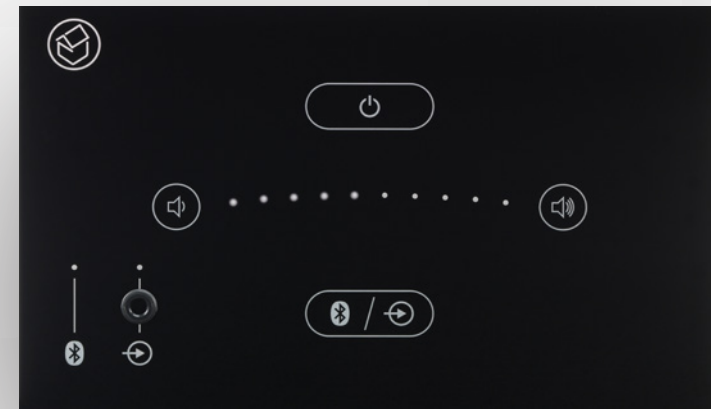

# Systemline E50

The E50 is a unique single room install audio system with intuitive gesture control making it perfect for a variety of applications, both domestic and commercial.

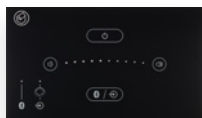

Each E50 comes with an ultra stylish wall panel, two install speakers and necessary speaker cable for a super simple installation process.

This system delivers a superior sound experience via Bluetooth streaming or via a TV, while fitting discreetly into any environment.

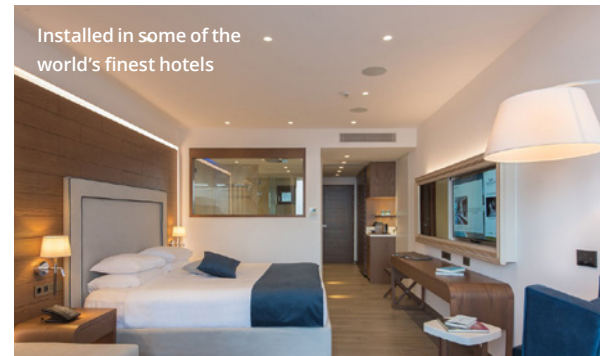

## Enhance their stay

Upgrade every room with this elegantly simple streaming speaker system

Installed in some of the world's finest hotels

Simple, intuitive controls for every guest

As your guests become increasingly dependent on their portable devices, it's vital to cater for their needs, and with the E50 you'll be providing an elegant, intuitive solution, enabling them to play their own content via Bluetooth or plug into a handy 3.5mm wired connection.

### Instant upgrade

Combining the simplicity of gesture control, Bluetooth streaming and two award-winning Q Acoustics speakers, your guests can enjoy the finest quality stereo playback rather than settling for sub-standard sound from the clock radio in the corner.

### Total control

Connectivity is great until a guest can't get on the right network, or connects to the wrong room, which is why the E50 has been designed so you can match hotel name and room numbers to individual Bluetooth receivers.

### Easy installation

The E50 comes complete with two discrete ceiling speakers and a flush-fitting control plate that mounts to a simple back box, offering custom-style control without the expense.

### A captive audience

With their own music to enjoy and enhanced TV sound available, your guests will spend longer enjoying their luxury accommodation, which should increase in-room spending.

### Keep the peace

Each Systemline E50 comes with the ability to limit the speaker's maximum volume, helping reduce night time noise.

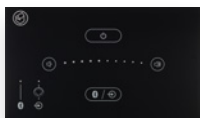

### Add sound in the bathroom

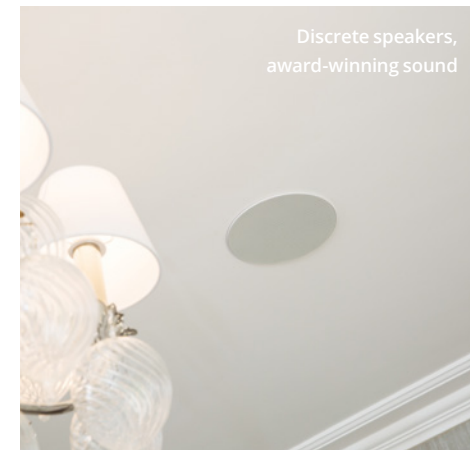

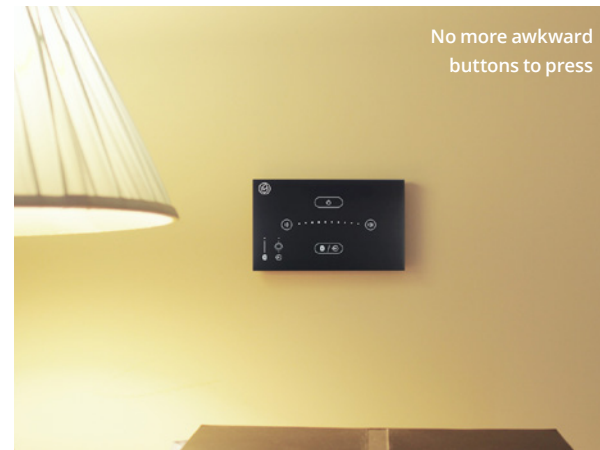

Two pairs of speakers can be connected to E50, so it's incredibly easy to bring music into the bathroom.

## Audio for all

Enhance your resident's quality of life with this hugely impressive built-in Bluetooth stereo speaker

Whether you're looking to enhance the environment in communal spaces, upgrade resident's rooms with an easy-to-use music system, or enhance the sound quality from the TV, the E50 has you covered, offering discrete in-ceiling speakers, Bluetooth streaming and both simple gesture and voice control.

### Enhanced features

Boasting two award-winning in-ceiling speakers, a wipe-clean touch control panel and Bluetooth (or 3.5mm line-in) streaming from compatible devices, the E50 takes up no space, sounds like a true stereo hi-fi and is far easier to use than most traditional clock radios.

### Total control

The E50 is perfect for communal areas of a residential care home, whether it be to enjoy music or enhance TV sound. Individual naming and volume limits can be set for ultimate control to ensure enjoyment for everyone.

### TV upgrade

By connecting the E50 to a TV (via Aux input) you can vastly improve the sound quality for the hard of hearing without simply turning the volume up. Our award-winning in-ceiling speakers can pick out more detail than your TV without disturbing the neighbours.

### Easy installation

The E100 has a low-profile control panel that mounts easily to a double gang wall socket offering custom-style control without the usual expense.

## For ultimate concentration

The smart, integrated audio solution,  
perfect for your private health practice

Hands-free functionality  
for in-theatre use

Simple & discreet wipe  
clean white unit

Upgrade the audio where it matters the most, with the Systemline E50 Bluetooth system. Built-in for a hygienic, clutter-free finish, the touch-panel can be controlled by simple gestures or using voice control\* while two discrete ceiling speakers provide award winning stereo sound.

### Simple installation

The E50 comes complete with two discrete ceiling speakers and a flush-fitting control plate that mounts to a simple back box, offering clutter-free integrated control without the expense.

### Hands-free simplicity

Skipping tracks and adjusting the volume couldn't be easier as the E50 comes with highly responsive gesture control – swipe to skip without touching the control panel – making it ideal for use in areas where gloves are worn, while Alexa compatibility means you can also just ask the speaker to change track.

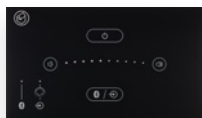

### Stay focused

According to the British Medical Journal (BMJ) music is played in the operating theatre 62-72 percent of the time, while around 80 percent of operating room staff say that music benefits cooperation between team members, reduces anxiety levels and improves efficiency.

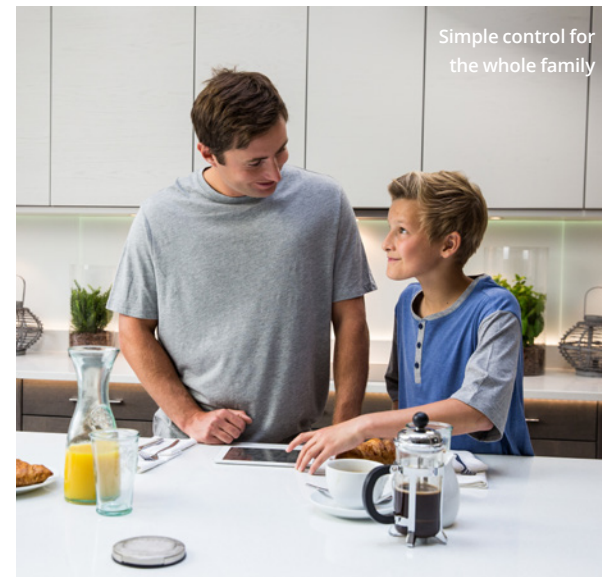

\*When used with Amazon Alexa

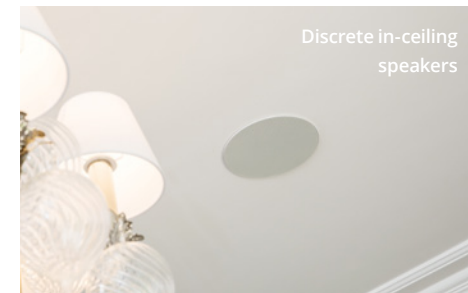

## A sound upgrade

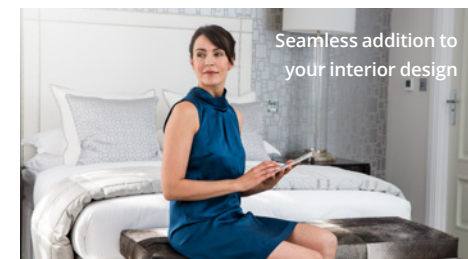

The simple, single room home audio system for the entire family

Simple control for the whole family

Discrete in-ceiling speakers

Seamless addition to your interior design

Upgrade the audio throughout your home with the elegant Systemline E50 Bluetooth system. Built-in for a cutting-edge clutter-free finish, the touch-panel boasts gesture and voice control while two discrete ceiling speakers provide award winning stereo sound.

### Kitchen

An essential upgrade for your busy kitchen, E50 cuts worktop clutter, is wipe clean and with gesture control and Amazon Alexa compatibility you can wave a flour covered finger or just ask for your favourite songs and stations.

### Bedroom

Create a calmer, clutter free boudoir with E50s simple Bluetooth streaming and thanks to TV connectivity you can enjoy better sound without needing to blast the volume.

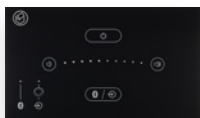

### Living room

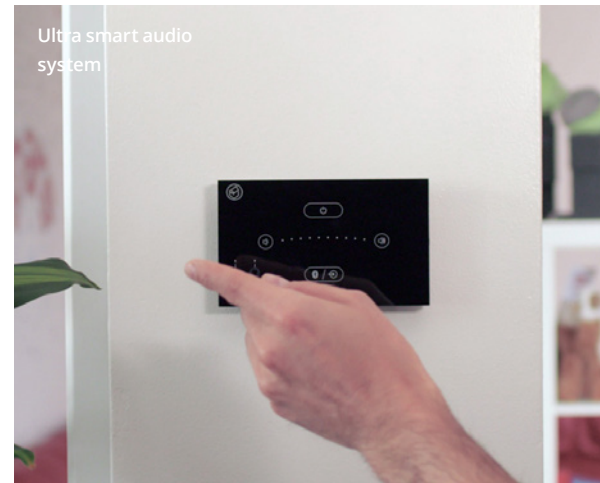

Stereo always sounds better, and with voice control, hidden speakers and the ability to enhance the sound of your TV you can just sit back, relax and enjoy.

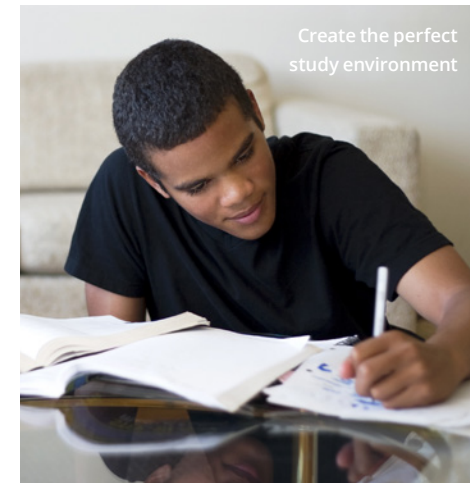

# Ultimate student residence

Stand out from the student crowd with this easy to install streaming speaker system

Ultra smart audio system

Create the perfect study environment

Elevate the appeal of your student accommodation with this built-in Bluetooth streaming audio system. The E50 enables residents to play their own content via Bluetooth or 3.5mm wired connection, while giving you control over the maximum volume.

## Easy installation

The E50 comes supplied with two discrete ceiling speakers and a flush-fitting hard-to-remove control plate that mounts to a standard-sized back box, offering custom-style control, and a premium finish.

## Luxury finish

An easy and affordable way to make your student accommodation stand out from the crowd, the E50 boasts gesture control, Bluetooth streaming and two award-winning Q Acoustic speakers that sound every bit as good as a dedicated hi-fi but take up zero space in the room.

## Total Control

Not only can you assign a name or room number to each Bluetooth network, but thanks to a password protected system, residents will only be able to connect to the speakers in their room, which removes the possibility of student hi-jinx and unwanted wake-up calls!

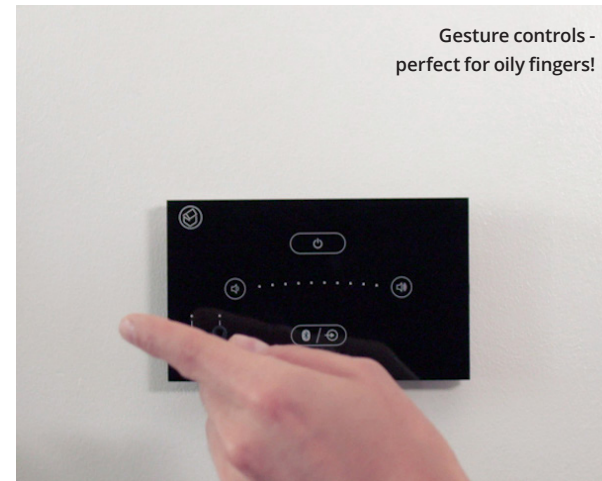

## Keep the peace

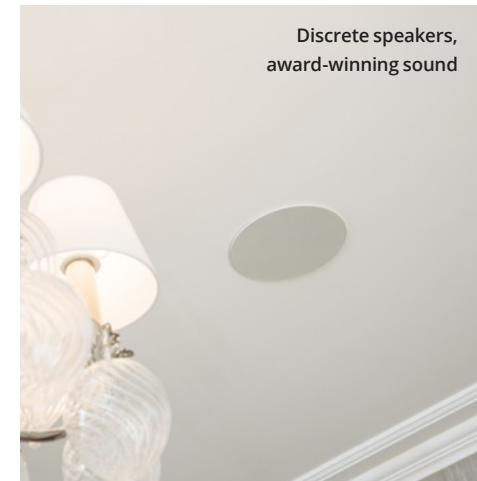

Each Systemline E50 comes with the ability to limit the speaker's maximum volume, helping reduce night time noise and aid student concentration.

Gesture controls -  
perfect for oily fingers!

Discrete speakers,  
award-winning sound

A well-chosen playlist makes all the difference between a relaxed or restless client, and thanks to the Systemline E50 Bluetooth system you can enjoy perfectly positioned hi-fi quality stereo sound and hygienic handsfree operation.

### Simple installation

The E50 comes with two discrete ceiling speakers and a flush-fitting control plate that mounts to a simple two-gang back box, offering clutter-free, flush-fitting integrated control.

### Set the mood

As you know, creating a welcoming and relaxed space is vital, and thanks to the E50 you can play superb quality audio from two perfectly positioned ceiling mounted speakers, giving your client the best possible experience, even before you start the treatment.

### Hands-free simplicity

Skipping tracks and adjusting the volume couldn't be easier as the E50 comes with highly responsive gesture control – swipe to skip without touching the control panel – making it ideal if you wear gloves or use massage oils, while Alexa compatibility means you can also just ask the speaker to change track.

## Set the mood

A hugely practical way to add high quality wireless audio to your treatment room

# Sound investment

Add a simple and elegant wow to every home with this simple streaming speaker system

As your customers become increasingly dependent on their portable devices for music in their cars, it is important to cater for this at home and on holiday. E50 enables all static home visitors to play their own content via Bluetooth or plug into a handy 3.5mm wired connection, just as they would in a car.

## Easy installation

The E50 comes complete with two discrete ceiling speakers and a flush fitting control plate that mounts to a simple back box, offering custom-style control without the expense.

## Value adding features

Boasting two award-winning in-ceiling speakers, a stylish wipe-clean touch control panel, E50 adds a genuine unique selling proposition desirability new homes. E50 is simple to connect to with Bluetooth (or 3.5mm line-in) streaming from compatible devices, the E50 takes up no space, sounds like a true stereo hi-fi and is far easier to use than most traditional clock radios.

## TV upgrade

By connecting the E50 to a TV (via Aux input) you can vastly improve the sound quality for the hard of hearing without simply turning the volume up. Our award-winning in-ceiling speakers can pick out more detail than your TV without disturbing the neighbours.

## Add sound in the bathroom

Two pairs of speakers can be connected to E50, so it's incredibly easy to bring music into the bathroom.

## Case study: ABI

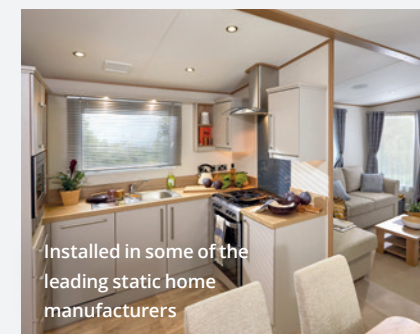

*"Systemline was undeniably the best on the market."*

For the past 40 years, ABI has designed and manufactured an industry-leading range of luxury caravans and holiday homes.

ABI's team of experienced engineers, designers and craftsmen carefully consider even the tiniest aspect, products, ABI chose to from the reliability of key components to durability of materials and quality of fabrics, to ensure its delivers products of the finest quality.

ABI was looking for a built-in audio system that could be simply installed into its range of caravans to provide added value to prospective buyers.

The solution needed to be easy-to-use whilst allowing owners the freedom to access the system using their own smart devices. After being impressed by Systemline's innovative range of products, ABI chose to install the company's E50 single-room audio solution.

Installed in some of the leading static home manufacturers
